

Ornamental growing schedule

Copyright © 2015 by Shane Smith All rights reserved reproduction in any way is strictly prohibited.

In the following chart the term “grown warm” refers to a greenhouse that has night temperatures consistently above 50° F (10° C). When the chart refers to “grown cool,” it is for a greenhouse with night temperatures that consistently run below 50° F (10° C). Keep in mind that the cooler the greenhouse, the slower your plant will grow and come into bloom

Ornamental Plants Started in JUNE AND JULY

Plant Name	Bloom Date Grown Warm	Bloom Date Grown Cool	Propagation
Aster	December	January	Seed
Azalea	April	May	Cutting
Browallia	December	February	Seed
Calceolaria	March	April	Seed
Calendula	October	November	Seed
Geranium	October	November	Seed/cutting*
Globe amaranth	October	November	Seed
Gloxinia	February	March	Seed
Impatiens	September	October	Seed/cutting
Larkspur	September	October	Seed
Pansy	December	January	Seed
Poinsettia	December	January	Cutting
Polka-dot plant	October	November	Seed
Poppy	September	October	Seed
Salpiglossis	October	November	Seed
Snapdragon	October	November	Seed
Statice	September	October	Seed
Stock	December	January	Seed
Sweet pea	November	December	Seed
Thunbergia	October	December	Seed
Zinnia	October	November	Seed
Ageratum	January	February	Seed
Anemone	January	February	Bulb/seed*
Browallia	January	March	Seed
Calceolaria	March	April	Seed
Calendula	December	January	Seed
Chenille plant	August (next)	September (next)	Cutting
Cineraria	February	March	Seed
Freesia	February	March	Bulb

Plants Started in JUNE AND JULY continued

Plant Name	Bloom Date Grown Warm	Bloom Date Grown Cool	Propagation
